DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

1. In general, the claims recite a method of inputting an address of a recipient in a messaging service with the steps of:

(a) determining whether a direct inputting of the address of the message recipient on a message editing window is selected by a user of the messaging service; and

(b) if it is determined that the direct inputting of the address in the message editing window has been selected in the step (a), entering the address of the message recipient directly into the message editing window activating with the message editing window activated.

The examiner notes the novel concepts as the combination of:

i. providing a choice for the user to either directly input the recipient address and/or not directly input the recipient address (eg. in the message editing window)

ii. providing means for the user to add the recipient's address into the message editing window.

Based on his search, the examiner was unable to find prior art which taught these concepts.
